Performance. We are very pleased that our portfolios increased 1.8% in 2002 and our Dag's Exclusive Picks provided a return of 7% in the same year while the S&P 500 declined 23.4% (Source: Hulbert).

Dear Dr. Dagnino,

Wow ... You are definitely the most insightful and thought provoking market commentator I have ever come across.

You have changed my whole way of viewing the financial markets overnight.

I've scaped literally hundreds of websites looking for quality commentary, and I have never found one until I came across yours.

Thank you for providing such wonderful service at such an affordable price.

Sincerely,

The timing of your value and hedge recommendations is amazing. You recommended value while I still wanted to invest in technology. You recommended hedge investments when gold had not made an up move in years.

Thank you.
